

Enhance Your Mobile App With Actionable Community-Sourced Safety and Risk Intelligence

Engage Your Entire Audience

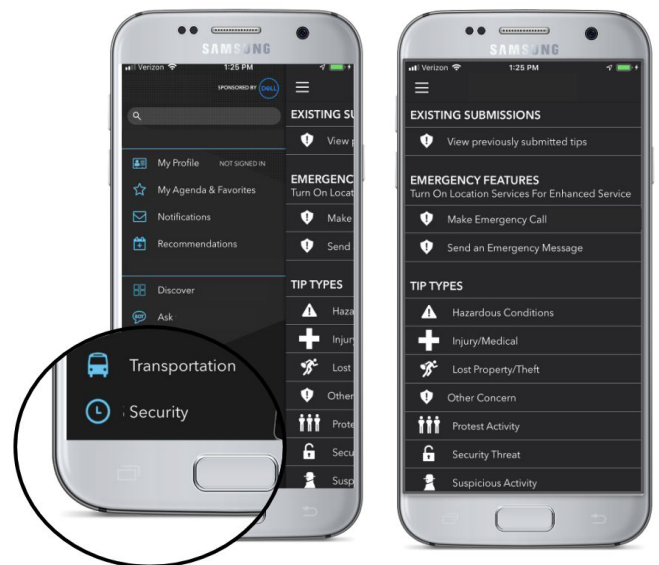

Engage your people with safety as a service, right in their favorite mobile apps.

The LiveSafe Mobile SDK allows you to embed our industry leading community-sourced risk intelligence features directly in any mobile application. Why download a separate app?

Extend your reach to thousands of new users through integration. Be able to reach all of your users with a broadcast message. Let them surface risks to you with a few clicks. Power is truly in numbers.

Make safety and risk prevention an integrated part of your user experience.

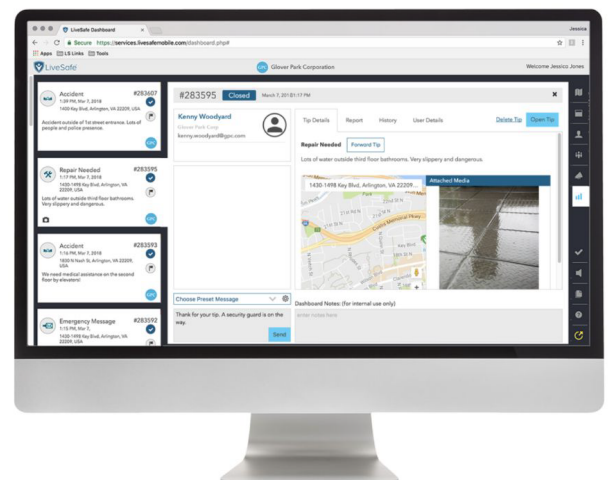

Increase the utility and robustness of your existing mobile app with minimal development effort. Prevention is an everyday activity, make it front and center.

New Channel, Same Results

Achieve up to six-figure ROI by preventing incidents. Even one tip can disrupt a pattern of behavior and stop a potentially catastrophic, brand-damaging, and costly event from occurring.

Suspicious Behavior. Facility Maintenance. Bullying and Harassment. Mental Health Concerns. There are a multitude of risks that surface every day that can be prevented or mitigated. Risk is more than just physical security.
