

LiveSafe

Perceptions of safety and sexual assault on- and off-campus

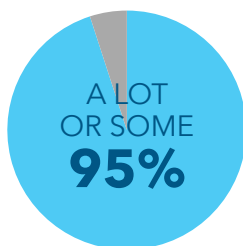

From March 5th to March 20th 2015, LiveSafe asked users at six participating universities to complete a five-minute survey. Below are some of the key takeaways from the aggregated data across the institutions.

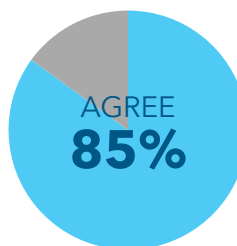

Gender breakdown of respondents

- Male
- Female
- Other

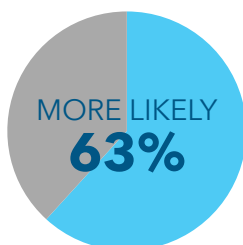

BREAKDOWN OF DATA

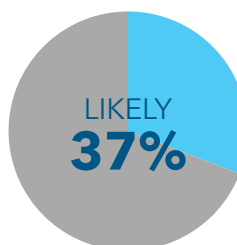

How much influence do you think you and your friends have on each others' safety?

Do you agree that communicating through the LiveSafe app, and resources in the app, are helpful options for students dealing with sexual assault?

When you or your friends are in need of help, does having LiveSafe available to you make you more likely to ask for help?

When you and your friends split up at night, how likely are you to use the LiveSafe app and SafeWalk to keep track of each other on a map and to summon help in an emergency?
